ELYOR KHUJAMOV

FRONTEND DEVELOPER

PROFILE

Dynamic and dedicated Junior Frontend Developer, Elyor Khujamov, with a passion for crafting engaging user experiences and a solid foundation in front-end technologies. Proficient in my skills with hands-on experience in building responsive and visually appealing web applications.

WORK EXPERIENCE

- I have finished our Frontend course recently so I haven't got en experience in a company yet. But I have made several user interfaces by knowledge which I have. I made them every my skills: Tailwind, JS, React.js

PROJECTS

ONLINE SHOP

We were given such a task that it was necessary to prepare the Front-end part of the online store. The tasks given in this task were: the user was
able to register, check if the user was real, build a full-fledged CRUD system, also prepare an Admin page, and there we had to make a CRUD system
even on the products. Yes, it was certainly during the study, but in real projects, we can also show our results.

BLOG APP

We created on ReactJS, similar to social networks like Instagram and the like. You can authenticate and authorize, that is, register and access this
application. After authentication or authorization, a personal page will open for you. On a personal page, you can create a post yourself, edit it, and
delete it. You can also see posts created by others. This app launches the full CRUD system

SOFT SKILLS

- Communication Skills
- Teamwork and Collaboration
- Adaptability
- Problem-Solving
- Critical Thinking
- Emotional Intelligence
- Conflict Resolution
